Introduction

During the 2017 BTC Rally, Many ICO (Initial Coin Offerings) came into the market through presales. Most of the startups needed to write their presale contracts to raise the fund and it requires a steep learning curve in Solidity Programming Language. For some ICOs this worked alright and they are successful in the current market. However, In the bear market most of the projects failed to survive. Reasons behind the failures are varying, but security, not enough trust by initial presale investors were present in most of the failures.

DexPad, short for Decentralized Launchpad, aims to resolve many of the issues that were problematic for many projects. Our platform will offer a complete solution for the team who are looking for services like minting their token, raising money through presale, lock their tokens and airdrop some bonus tokens. The platform will use governance protocol to determine the audit of tokens. Proposals can be used for various reasons such as setting up the fees, adding security auditors and deciding on further development and features. When a user or team member wishes to put in a new proposal a predetermined amount of Native token (**DXP**) will need to be used.

Name of the DXP will be updated later on to avoid scam tokens with the same name.

Features of DexPad

- Reliable token sales; automatically generated on desired blockchain through use of secured smart contracts.
- Automatic airdrop of participating project tokens to all DXP stackers.
- Community and team proposals to redirect funding.
- **Anti Honey Pot Mechanism** to avoid exit scams.
- Instant liquidity listing on following DEXs to avoid rug pulls.
 - Uniswap for Ethereum network
 - Pancakeswap for Binance smart chain
 - Quickswap for Polygon network
 - Photonswap for Cronos Network
- **Sharing of token bonuses** with DXP holders and stakers.
- Deflationary DXP token through **incentivized token burn**.
- Integration with any Decentralized Exchange as a potential Decentralized IEO platform

| DexPad Ecosystem

Tokens are created using secured and verified smart contracts. Tokens based on cronos chain are currently supported and many other chains will be added later on such as Polygon, BSC, ETH etc. Token sales carried out through our platform DexPad will give participants more reliability knowing that presales created on DexPad will go through Anti Honey Pot Mechanism which will guarantee that presale owner will receive liquidity and fund only after 100% token claim . Users will be able to participate reliably knowing that a portion of the funding will be automatically locked for liquidity purposes and at-least for a month (which can be increased through governance proposal).

The DexPad platform is extremely easy to use and interact with. This will save the team's time from all the research required to run the sale and let them focus on their project. The only fee that token sale teams need to pay is 2% of sale token and 2% of native token after successful completion of their presale out of which sale tokens will be distributed amongst DXP token holders as reward. Upon completion of presale a predetermined amount of sale token will be automatically locked for liquidity on DEXs mentioned above.

\$DxP Token

The DexPad ecosystem will be democratized and decentralized by the \$DxP token that will make the token holders not just part of the ecosystem and governance council but also the key architects behind the decision-making process and the path taken by the whole ecosystem. The \$DxP token has been designed to have a number of use cases that will give power back to the community and offer unique benefits to token holders within the ecosystem. Some use cases of \$DxP token include:

Staking for pool access

- Stake \$DxP to participate in token launches of projects building on CRONOS chain

Governance

- Hold tokens to vote and submit proposals

Liquidity mining

- Rewards for liquidity providers

Fees

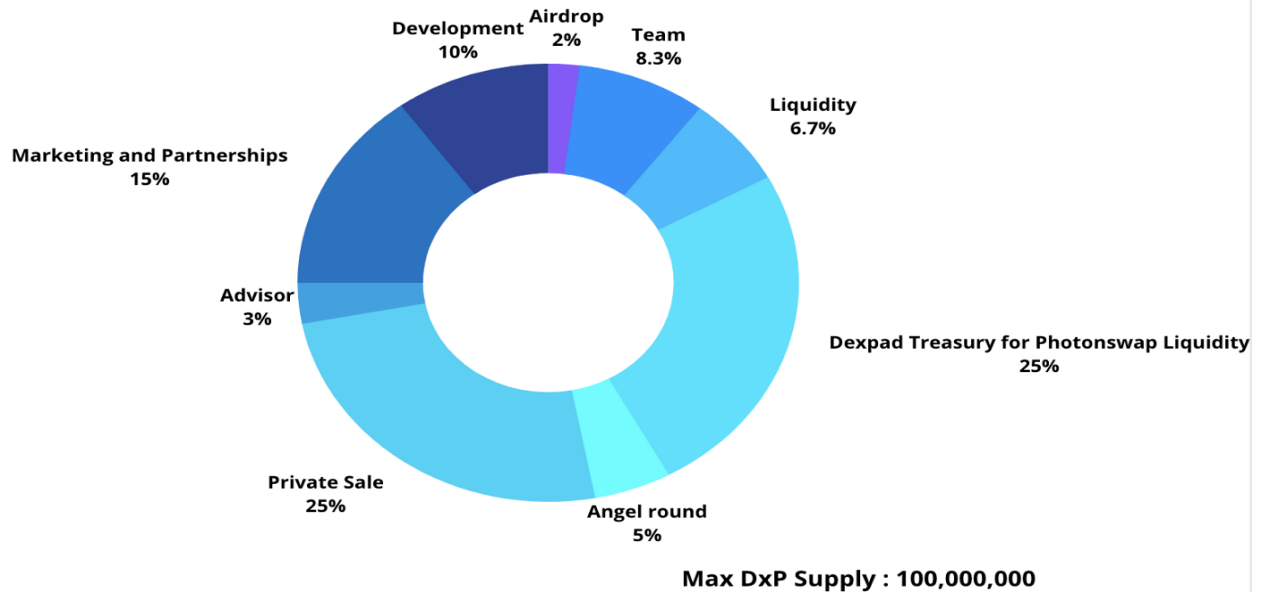

- Earn a percentage of fees that accrue to the treasury by holding \$DxP tokens

User participation incentives

- Ecosystem participants who engage in platform services and support distributed governance

DxP TOKENOMICS

SaleOnomics	Percentage	Price(\$)	Worth(\$)	Vesting
Angel round	5%	0.005	25,000.00	Locked for 2 years in Photonswap staking contract
Private sale	25%	0.015	375,000.00	15% at TGE and 18 months linear vesting
Airdrop	2%	0.03	60,000.00	Early Lockers and beta testers
Liquidity	6.677%	0.03	200,000.00	Locked for 2 year in PS staking contract
Team	8.33%	0.03	250,000.00	6 Month lock & 2 year linear vesting
Advisors	3%	0.03	90,000.00	2 Month lock & 2 year linear vesting
Marketing and Partnerships	15%	0.03	450,000.00	15% TGE & 2 year linear vesting
Development	10%	0.03	300,000.00	Acceccible reserve
DexPad treasury for Photonswap Liquidity	25%	0.03	750,000.00	Locked (PhS) liquidity 5 years per project

DexPad.IO RoadMap

V 1.0.1

Q3 - 2021

DexPad Platform

- DexPad website launch with Token Factory, Market Place, Locker and Airdropper Launch on Cronos, Polygon, Binance Smart Chain **testnets**.

Social Media

- Social Media Accounts on Twitter, Medium, Reddit and Discord.

Write Ups

- Documentation and Guide.
- White Paper with Tokenomics

Q4 - 2021

DxP Token

- Launch of DxP token
- **Stake and Earn**
- **Buyback and Burn**
- **CMC** and **coingecko** listing

Mainnet launch

- Launching all current products on EVM compatible **main-nets** such as Cronos, Polygon, Binance Smart Chain, Avalanche, Fantom and many more

Infrastructure

- Integrating CDN and captcha

Q1 - 2022

Decentralised Exchange on upcoming main-nets.

Bridge for the Native token between CRO, ETH, BSC, Polygon.

Yield Farming

● CONCLUSION

With innovative projects penetrating into the Blockchain Industry everyday, there are a wide range of opportunities for users to participate in the launch of early-stage projects. These provide maximum growth potential to early supporters belonging to the vibrant community of DeFi. Currently, the focus is transitioned towards building a mature platform that can offer projects with a comprehensive approach to revolutionize space.

DexPad is the Decentralized Native Launchpad and an Initial DEX Offering platform for projects based on the Multiple blockchains

DexPad is being positioned as an ecosystem accelerator and an advanced platform enabling projects to smoothly progress from a successful fundraiser to platform launch.

Its unique features and commitment to decentralization place it among the highest tiers of launchpad, and its principle of putting the community first will ensure mass adoption. The novel idea of rewarding its token holders will enrich the token sale experience while the platform itself is developed to serve the best interests of teams, investors and the community. The goal of the project is to grow into a fully decentralized, reputable launchpad ecosystem that supports teams as they bring ideas to life.

We welcome our supporters and the community to help in achieving this goal and become a part of our grand vision

Thank You
